Pela Slim case for iPhone 12/12 Pro - Currant

Designed for an outdoorsy type that loves their tech, and really gives a damn. Pela products are designed to protect your devices, and our planet Earth. Unlike conventional plastics that will last in a landfill for hundreds or thousands of years, Pela products are made with a 100% Compostable Bio-Polymer and plant fibers.

Protects & Preserves Our Oceans

Pela donates a % of every sale to Ocean Cleanup and Preservation Initiatives. Every case sold = less plastic in the ocean.

Biodegradable & Eco-Friendly

100% Compostable. Made from Flax shive and a plant-based biopolymer create the base for our compostable cases

Pela 360 - Send us your old case

We will find a graceful end of life for your conventional plastic case by making sure it gets recycled properly.

The only thing that feels better in your hand than a Pela case is an even thinner Pela case! Designed with a minimal aesthetic for durability and style, the Pela slim case is crafted with a smooth fit and grip texture so it slides in and out of your pocket but not out of your hands. Our Slim phone case is two times thinner than our regular case. It is 100% compostable, eco friendly, and protects your iPhone against bumps and scratches.

How it Feels

Soft, flexible and a little bit of grip is how every Pela Case can be described. Outside of being able to protect your phone and protect the planet, the next most important thing is how a case feels in your hands!

Materials

The Pela Case is made of Flaxstic®, which is comprised of compostable bioplastic elastomer and flax straw materials. Our material has been tested to be safe and free of phthalates, BPA, cadmium and lead and is verified to meet child safety standards in the U.S., Canada, Europe, Australia and New Zealand. Our base material meets U.S. (ASTM D6400-04) and E.U. (EN 13432) standards for composting in an industrial composting facility and has a lower carbon footprint and lower greenhouse gas emissions than traditional plastic. It can also be left to biodegrade in a home composting environment.

Case Design

Meticulously designed to protect your phone from drops and scratches as well as any traditional plastic case. Precision cuts around speakers, charger, volume and power buttons. Carefully designed wrap around edges to protect the front of your phone. Smooth to the touch with no extra bulk.

SPECIFICATIONS

Carton: 6/24
Item ID: 10781-03-IP61-C
