

ALOGIC Clarity Fold Touch is a premium 27 inch 4K touchscreen monitor built for hands-on productivity on Mac and Windows. With accurate colour, a flexible fold-down stand for comfortable touch and stylus work, a retractable webcam for privacy, and a USB-C dock that powers your laptop, it is designed to simplify your desk without compromising image quality.

- 27 inch UHD 4K touchscreen with edge-to-edge glass
- 65W USB-C single-cable docking and laptop charging
- Fold-down ergonomic stand built for touch and stylus work
- Retractable pop-up webcam for video calls and privacy
- Colour-accurate IPS display with wide gamut coverage

27 inch UHD 4K touchscreen with edge-to-edge glass

Work directly on a sharp 3840 x 2160 display that gives you plenty of screen space to multitask comfortably, with two windows side by side, and review fine detail. The 10-point multi-touch panel supports intuitive gestures, making everyday tasks like scrolling, zooming, marking up and navigating feel natural, empowering you to use your Mac or Windows computer like a 27" iPad™. The edge-to-edge glossy glass finish delivers a clean, premium look on the desk.

65W USB-C single-cable docking and laptop charging

Connect your laptop with one USB-C cable to drive 4K video while charging up to 65W. The integrated hub helps reduce cable clutter and supports connecting peripherals through built-in ports, making it easy to switch between work modes without constantly replugging accessories.

Fold-down ergonomic stand built for touch and stylus work

The included fold stand is designed to be stable under hand pressure and quick to adjust. Lower the screen to a supportive angle for extended touch or stylus sessions, then raise it back up to a comfortable viewing height for everyday desktop use. When paired with the snap-on Clarity Active Stylus (sold separately), Clarity Fold Touch becomes the perfect drawing board for your next big idea, or a convenient way to annotate or sign documents. With 4096 levels of pressure sensitivity and tilt support, the stylus is ideal for use in Photoshop, Illustrator and other creative apps, while its months-long battery life and pairing-free connectivity make it practical for everyone.

Retractable pop-up webcam for video calls and privacy

A built-in webcam is perfectly positioned to capture your best angle and pops up when you need it then automatically slides down into the monitor when you do not. This keeps the camera out of sight when not in use and adds a practical layer of privacy for home offices and shared workspaces.

Colour-accurate IPS display with wide gamut coverage

Clarity Fold Touch uses an IPS panel tuned for accurate colour and consistent viewing angles. With 100 percent sRGB coverage and an average Delta E below 1, it is well suited for design work, content review and any workflow where dependable colour matters. Support for HDR 400 adds extra dynamic range for compatible content.

Package includes:

- Clarity Touch Monitor
- Clarity Fold Stand
- USB-C Cable
- DisplayPort Cable
- HDMI Cable
- USB-B to USB-A Cable
- User Manual
