ALOGIC Aspekt 32" 4K UHD Matt Docking Touch Monitor with 90W PD (no stand) - Space Grey

Stand sold separately. Images showing the stand and pen are for illustrative purposes only.

ALOGIC Aspekt 32" 4K Touch Docking Monitor transforms your desk into a powerful, clutter free creative and productivity hub. With a precision touch screen, all in one docking, high accuracy colour, and up to 145 watt device charging, it is designed to be the centre of your modern workspace for both Mac and Windows.

- Intuitive 32 inch 4K touch screen for Mac and Windows
- Precision stylus ready display for creatives and professionals
- Built in full function docking station with single cable connectivity
- Industry leading 145 watt charging for laptop, tablet and phone
- Colour accurate IPS panel for photographers, designers and videographers

Intuitive 32 inch 4K touch screen for Mac and Windows
Aspekt gives your computer a 32 inch 81.3 centimetre ultra sharp 4K touch screen that feels as natural as using a tablet or smartphone. The 10 point multi touch panel lets you tap, pinch, zoom and swipe to navigate documents, timelines and web pages with ease. Whether you use Mac or Windows, you can use the familiar multi touch gestures you already know to work faster and more intuitively, all on a large canvas that makes multitasking and detail work effortless.

Precision stylus ready display for creatives and professionals
Paired with a compatible active stylus with up to 4096 levels of pressure sensitivity, Aspekt becomes a large format digital sketchbook and annotation surface. The smooth glass finish and responsive touch layer are ideal for sketching concepts, painting, retouching photos, marking up blueprints or reviewing presentations. Fine pressure control allows for natural pen strokes, subtle shading and detailed edits, helping digital creatives and professionals replace stacks of paper with a single powerful screen.

Built in full function docking station with single cable connectivity
Aspekt is more than a monitor. It is a true docking station built into an elegant aluminium frame. Connect your laptop with a single USB C cable to add the 4K touch display, wired network, multiple USB accessories and daisy chained external displays. With support for daisy chaining on Windows, you can link Aspekt directly to an additional 4K monitor or two QHD monitors without a separate dock or extra video cables. Everyday accessories plug into easily accessible side ports, while rear ports keep long term connections neat and out of sight for a cleaner desk.

Industry leading 145 watt charging for laptop, tablet and phone
Aspekt is the heart of your charging setup, delivering up to 145 watt total power. It can provide up to 90 watt to keep your laptop charged, 30 watt fast charging for a tablet, 15 watt for a phone and additional power for smaller USB accessories such as styluses, wireless earbuds or webcams. All of this is supplied from the included high capacity power adapter, so you can retire multiple separate chargers and power boards and power your entire workspace directly from the monitor.

Colour accurate IPS panel for photographers, designers and videographers
Designed for visual professionals, Aspekt offers an IPS panel with 100 percent sRGB, 99 percent Adobe RGB and 95 percent DCI P3 coverage, delivering a wide and accurate colour gamut. With an average Delta E below 2, colours remain consistent and true to life for both digital and print workflows. The 400 nit typical brightness, 1000 to 1 contrast ratio and wide 178 degree viewing angles make it easy to collaborate around the screen without colour or contrast shifting, while the gloss finish enhances clarity and vibrancy for detailed work.
