SATECHI

Satechi Slim EX Wireless Mouse - Blush

Satechi Slim EX Wireless Mouse is a refined, ergonomic pointing device made for MacBook Neo and built for modern workflows across multiple devices. Because it connects over Bluetooth, it never touches Neo's single USB-C port or a slot on your hub — leaving every connection free for storage, displays, and peripherals. With dual Bluetooth channels, a USB-C 2.4GHz receiver, quiet clicking, and USB-C recharging, it delivers precise control in a clean, premium design that fits seamlessly into your desk setup or travel kit.

- 3-in-1 wireless connectivity for effortless switching
- Dual Bluetooth channels for two devices
- 2.4GHz USB-C receiver for a reliable, low-latency connection
- Quiet clicks and a precision scroll wheel for focused control
- 3 programmable buttons for a customizable workflow
- USB-C rechargeable with removable battery and aluminum construction

Made for MacBook Neo
Neo has one real port — that's not a limitation; it's the opportunity. Connecting over Bluetooth, the Slim EX never occupies a hub slot, so every port stays free for storage and peripherals. Pair it with a Satechi hub for a complete Neo desk — display, storage, and charging, all accounted for — finished in colorways made to match Neo, right down to Blush.

3-in-1 wireless connectivity for effortless switching
Move between workstations without interrupting your flow. The Slim EX supports two Bluetooth connections plus a dedicated 2.4GHz connection, so you can keep up to three devices ready and switch as needed.

Dual Bluetooth channels for two devices
Pair with up to two Bluetooth-enabled devices and switch between them without re-pairing. It's well-suited for setups that combine a laptop and tablet, or a home and office computer.

2.4GHz USB-C receiver for a reliable, low-latency connection
For environments where you prefer a dedicated wireless connection, the included USB-C receiver provides stable performance with responsive tracking. It's a practical option for desktops and laptops with USB-C ports.

Quiet clicks and a precision scroll wheel for focused control
Quiet click switches help you stay discreet on calls and in shared spaces, while the precision-machined scroll wheel provides smooth, consistent scrolling for everyday productivity. A 1200 DPI PixArt PAW3212 optical sensor ensures accurate, responsive tracking across surfaces.

3 programmable buttons for a customizable workflow
Three programmable buttons let you tailor the mouse to your workflow and map shortcuts to the way you actually work.

USB-C rechargeable with removable battery and aluminum construction
Recharge via USB-C for straightforward power top-ups. The removable battery delivers up to 3 months of continuous use and over a year in sleep mode, and the anodized aluminum body adds durability with a clean, professional finish. The mouse is tested for over 3 million clicks and 100,000 scroll cycles, built to last well beyond everyday demands.

Package includes:

- 1x Satechi Slim EX Wireless Mouse - Blush
- 1× USB-C 2.4GHz Wireless Receiver
- 1x USB-C to USB-C cable (0.8 m)
