

myFirst 3dPen Make Filaments Fun Pack Wheels in Motion

Give kids the power to design, build, and play in 3D. The myFirst 3dPen Make Filaments Fun Pack Wheels in Motion adds safe, low-heat PCL filaments, easy templates, and a movement module so their car ideas can jump off the page and come to life. It is the perfect add-on for learning, playtime, and gifting.

- Kid-safe and worry-free
- Guided projects with ready-to-use templates
- Bring creations to life with movement
- Boost creativity and skills
- Perfect add-on for learning, playtime, or gifting

Kid-safe and worry-free

Made from low-temperature PCL filament, this pack is designed for little hands. PCL softens at lower heat than standard 3D pen plastics, helping reduce the risk of burns and making it easier for kids to shape, join, and adjust their creations with confidence.

Guided projects with ready-to-use templates

Getting started is simple. The Insect Adventure theme includes five step-by-step drawing templates that guide kids through building fun car characters and parts. Templates help young creators learn tracing, layering, and assembly while building pride in every finished piece.

Bring creations to life with movement

Add motion to the mix. The included movement module lets kids animate selected builds, turning static insects into moving creations for an extra dose of excitement and engagement.

Boost creativity and skills

3D drawing nurtures fine motor control, spatial awareness, problem-solving, and imagination. As children trace, layer, and assemble, they learn to plan, iterate, and turn ideas into tangible models they can hold and play with.

Perfect add-on for learning, playtime, or gifting

Pair it with the myFirst 3dPen Make to expand creative possibilities at home, in classrooms, and at parties. It is a thoughtful gift that delivers hands-on fun and educational value in one box. Note: myFirst 3dPen Make is not included.

Package includes

- 12 PCL filament rolls, total 24 m
- 5 drawing templates
- 1 ClockDrive movement tool
- 1 thermoplastic sheet

Product specifications

- Filament material: Low-temperature PCL
- Total filament length: 24 meters across 12 rolls
- Theme: Wheels in Motion
- Compatibility: Designed for myFirst 3dPen Make and other low-temperature 3D pens
- Included accessory: ClockDrive movement tool and thermoplastic sheet
- Note: myFirst 3dPen Make 3D pen not included
