Effortless to grow, right in your kitchen

Experience the joy of gardening without the complications. The Click & Grow Smart Garden makes it a breeze to cultivate fresh thyme; no green thumb is required. Your indoor garden manages the watering and light, providing perfect growing conditions for your thyme every step of the way.

Perfect for adding zest to a variety of dishes

Thyme is the quintessential herb for culinary enthusiasts, elevating meats, fish, eggs, and vegetable flavours. Rich in vitamins, thyme retains its distinct taste even under heat, making it a must-have for any home gourmet.

A lovely, creeping growth habit that's easy to maintain

Admire your thyme's unique 'creeping' growth, which gives it a delightfully rustic appearance. This natural spreading habit means your thyme will grow fuller and lusher, creating an attractive addition to your indoor garden landscape.

Ready for the first harvest within one month

In just a few weeks, you'll be ready to enjoy the fruits of your Click & Grow garden. Begin by gently trimming the tips of the plant; before you know it, new stems and fresh flavours will come to life in your dishes.

Ideal for drying and storing for long-term use

Thyme is wonderfully fresh and dries beautifully, allowing you to preserve its flavour for up to a year. Harvest, dry, and store your thyme in a sealed jar to keep your pantry stocked with this essential herb.
