

ALOGIC Clarity 32" UHD 6k Monitor with 95W Power Delivery Touch Screen w/ Fold Stand

ALOGIC Clarity 6K Touch is a breakthrough 81.3 cm touchscreen monitor that transforms your desk into a powerful creative studio. With its ultra-high 6K resolution, true-to-life colour, intuitive multitouch and stylus support, and a built-in USB-C hub, it is designed from the ground up for professionals who demand precision, flexibility and simplicity in a single display.

- World's first 6K touchscreen for ultimate clarity and control
- Professional-grade colour accuracy for creatives
- Intuitive multitouch and digital drawing with active stylus support
- Flexible stand for upright use, drafting and effortless sharing
- All-in-one USB-C hub with up to 95 W laptop charging

World's first 6K touchscreen for ultimate clarity and control

Clarity 6K Touch delivers a spectacular 6016 x 3384 6K UHD resolution on a 81.3 cm IPS panel, giving you almost 2.5 times the screen space of a 4K display. With a retina-friendly 216 pixels per inch, individual pixels virtually disappear, so text looks razor-sharp, photos reveal incredible detail and timelines feel more spacious. The glossy finish enhances clarity and contrast, making every visual element stand out whether you are editing, designing or reviewing content.

Professional-grade colour accuracy for creatives

Developed with creative professionals in mind, Clarity 6K Touch is factory calibrated to deliver consistently accurate colour. It covers 100% sRGB, 99% Adobe RGB and 99% DCI-P3 colour gamuts with an average Delta E of less than 1, so what you see on screen is what you can expect in print or final output. With a static contrast ratio of 2000:1 and HDR 400 compatibility, shadows, highlights and midtones are all rendered with exceptional nuance and depth for photo, video and design workflows.

Intuitive multitouch and digital drawing with active stylus support

The 10-point multitouch touchscreen eliminates barriers between you and your work. Pinch to zoom, swipe, tap and navigate your Mac, Windows PC or Chromebook as naturally as you would on a tablet, but on a much larger canvas. When paired with the ALOGIC Clarity Active Stylus or other compatible Microsoft Pen Protocol 2.0 active styluses, the display becomes a high-precision 81.3 cm digital drawing board with low latency and 4096 levels of pressure sensitivity, ideal for sketching, drafting, annotating and detailed artistic work.

Flexible stand for upright use, drafting and effortless sharing

The included Clarity Fold Stand lets you instantly switch between traditional upright monitor use and a low, ergonomic drafting position where the screen rests close to the desk like a drawing tablet. Whether you are writing, drawing or editing, you can find the most comfortable angle for long sessions. The stand's 360-degree rotating base makes it simple to rotate the screen to show clients, colleagues or collaborators your work without moving the entire monitor or changing your seating position.

All-in-one USB-C hub with up to 95 W laptop charging

At the heart of your setup, Clarity 6K Touch doubles as a powerful USB-C docking hub. Connect a compatible laptop with a single USB-C cable to enjoy video, data and audio alongside up to 95 W USB-C Power Delivery for charging. Two USB-A ports allow you to plug in accessories like keyboards, mice or drives, while the USB-B connection links the monitor's hub back to your computer. With additional DisplayPort and HDMI inputs, integrated 2 x 5 W speakers and a 3.5 mm audio port, the monitor simplifies your cabling and keeps your desk clean and efficient.

Package includes

- 1 X ALOGIC Clarity 6K Touch 81.3 cm Monitor - Silver and Black
- DisplayPort cable
- HDMI cable
- USB-C cable
- USB-B to USB-A cable
- Power adapter
