myFirst Voice 2 - Blue

Introducing the myFirst Voice 2 - Interactive Voice Recorder with Touch Screen for Kids, a delightful and versatile gadget designed to spark creativity and provide endless entertainment for children. Combining a powerful wireless speaker and dynamic microphone capabilities, this innovative device is perfect for interactive play and storytelling. With easy connectivity options and fun voice-changing filters, it transforms any environment into a lively karaoke session or imaginative playground.

- Dynamic Voice Modes
- Crystal Clear Sound Quality
- Compact and Portable Design
- Wireless Music Playback
- Voice and Reverb Control

Dynamic Voice Modes
With myFirst Voice 2, children can explore a variety of entertaining voice modes at the touch of a button. The device's AI Voice Changing Technology effortlessly transforms their voice into different characters, offering endless creativity for storytelling and interactive play. The modes available include normal, elderly, childlike, cute, and deep, each providing a distinct sound experience that brings stories to life.

Crystal Clear Sound Quality
Designed to deliver exceptional audio performance, the myFirst Voice 2 ensures every note and word is heard with clarity. The separation of the microphone and speaker results in high-quality sound output, while the echo enhancer adds depth, making every performance stand out. Special vibration bass technology further enriches the sound, providing an immersive experience for listeners.

Compact and Portable Design
The myFirst Voice 2 is compact and lightweight, making it simple for kids to handle and transport wherever their adventures lead. This portable design ensures children can enjoy entertaining activities on the move, transforming any space into their personal sound stage for endless enjoyment.

Wireless Music Playback
The device supports wireless music playback through Bluetooth connectivity or a micro SD card, giving kids the freedom to listen to their favorite tunes with ease. This versatile feature allows them to play music without the hassle of physical connections, enhancing their entertainment options.

Voice and Reverb Control
With intuitive voice and reverb control, children can fine-tune their sound to suit their preferences. These controls enable them to experiment with various effects, adding a touch of magic to their performances and making each interaction as unique as their imagination.
