SATECHI

Satechi EX1 Slim Wireless Keyboard Nordic Layout - Space Black

Satechi EX1 Slim Wireless Keyboard Nordic Layout is a compact, premium wireless keyboard made for smooth everyday use across your Apple or Windows devices. With quiet keys, multi-device pairing, and a rechargeable battery designed to last for weeks, it’s built to fit neatly into smaller workspaces without compromising on comfort or control.

- Compact slim design for smaller setups
- Multi-device wireless connectivity with quick switching
- Quiet, comfortable typing for focused work
- Long-lasting rechargeable battery with a removable design
- Mac and Windows mode with instant key remapping

Compact slim design for smaller setups
Designed to keep your desk clean and efficient, the EX1 Slim Wireless Keyboard fits comfortably in tight work areas and is easy to bring along in a bag. The low-profile build supports a natural typing position while maintaining a minimalist look that matches modern Apple setups.

Multi-device wireless connectivity with quick switching
Connect and work across multiple devices without interrupting your flow. The keyboard supports up to three Bluetooth connections and one connection via a 2.4 GHz USB-C receiver, making it easy to move between a MacBook, iPad, and iPhone, then jump to another device when needed.

Quiet, comfortable typing for focused work
The EX1 is tuned for a calm, quiet typing experience that suits shared spaces, offices, and late-night sessions. The key feel is responsive while staying controlled and discreet, helping you stay productive without distracting noise.

Long-lasting rechargeable battery with a removable design
Get extended use between charges with a battery designed to deliver up to five weeks of power on a single charge. Charging is handled via USB-C, and the battery is removable to support long-term ownership and meet EU 2027 replaceability requirements.

Mac and Windows mode with instant key remapping
A dedicated OS switch lets you toggle between Mac and Windows layouts so shortcuts and modifier keys behave as expected. This is ideal if you use Apple devices most of the time but still need compatibility with Windows hardware.
