iotty Smart Outlet model OSWDE - Black

The Iotty Smart Outlet model OSWDE is a recessed smart outlet with app control, energy monitoring and manual use. Control connected appliances from your smartphone, set routines around your day and keep track of energy consumption. Designed in Italy, its tempered glass faceplate brings a refined finish to your home.

- Control appliances from your smartphone
- Monitor connected devices' energy consumption
- Automate your outlet around your routine
- Use the outlet manually, even without WiFi
- Italian design with a tempered glass finish

Control appliances from your smartphone
Switch connected appliances on or off through the Iotty app for Android and iOS. Cloud connectivity lets you manage your outlet remotely, whether you are at home or away. The outlet also supports Google Home, Amazon Alexa, Siri Shortcuts and SmartThings for integration with your smart home.

Monitor connected devices' energy consumption
Keep track of the energy used by appliances connected to your outlet. View consumption in the app to better understand your household's usage and make informed decisions about when to run your devices.

Automate your outlet around your routine
Set your outlet to switch on or off based on time, location, sunrise, sunset or weather. Create schedules that suit your daily routine, so connected appliances operate when you need them.

Use the outlet manually, even without WiFi
Turn connected appliances on or off using the outlet's manual switch, without unplugging them. Manual operation works with or without WiFi, so everyday control does not depend on an internet connection.

Italian design with a tempered glass finish
Designed entirely in Italy, the Iotty Smart Outlet combines a tempered glass faceplate with a choice of five colours: white, black, blue, grey and tan. It replaces an existing flush-mounted outlet where phase, neutral and earth wiring are available. The outlet meets CE requirements and is tested and approved by TÜV.
