KeyBudz Element Series for AirPods Pro 3rd Gen - Carbon black

KeyBudz Element Series for AirPods Pro 3rd Gen – Carbon Black combines rugged all-round protection with everyday convenience. With a shock-absorbing interior, hard exterior shell and full IP68 rating, it keeps your AirPods safe from water, dust and accidental drops – at home, at the gym or on the go. All this in a sleek carbon black design that works seamlessly with both cabled and wireless charging.

- Secure locking that keeps your AirPods safely in place
- Soft inner lining with a tough outer shell for dual-layer protection
- IP68-rated water, dust and drop protection
- Easy access to charging port and pairing button
- Fully compatible with wireless charging

Secure locking that keeps your AirPods safely in place
Enjoy peace of mind wherever you are. The Element Series case is engineered with a secure locking system that keeps your AirPods Pro 3rd Gen firmly in place, even during intense activity or if you drop the case. No more accidental openings, no more unexpected slips – just reliable protection that keeps your earbuds exactly where they should be. Whether clipped to your bag, belt or keys, you can move freely knowing your AirPods are locked in and protected.

Soft inner lining with a tough outer shell for dual-layer protection
This case is built with a dual-layer design that combines comfort and durability. The soft, shock-absorbing inner material gently cushions your AirPods charging case, reducing the impact from everyday knocks and bumps. On the outside, a hard plastic shell shields against scratches, rough surfaces and the elements. Together they create a robust yet refined protective solution that keeps your AirPods looking and performing like new.

IP68-rated water, dust and drop protection
With IP68-rated protection, the Element Series is ready for real-life use in all kinds of environments. Your AirPods Pro 3rd Gen are protected against water and dust intrusion, helping prevent damage from rain, splashes, dirt and debris. The rugged construction also offers reliable drop protection, reducing the risk of damage from accidental falls. Whether you are commuting, training outdoors or travelling, this case is built to handle it.

Easy access to charging port and pairing button
Protection should never get in the way of usability. The Element Series case is precisely designed to keep all functions of your AirPods Pro 3rd Gen easily accessible. A dedicated opening lets you plug in a charging cable without removing the case, while the pairing button remains simple to reach whenever you need to connect a new device. You get full protection without sacrificing everyday convenience.

Fully compatible with wireless charging
Keep your charging routine effortless and clutter-free. The Element Series is fully compatible with wireless charging, so you can place your AirPods Pro 3rd Gen directly on a wireless charging pad without removing the case. Just drop them on the pad and power up – no cables to manage and no extra steps. It is a truly seamless experience that fits right into your daily routine.
