

MAUS Laden 3 - Charging Cabinet

MAUS Laden 3 is a robust, lockable charging cabinet designed for safer, controlled charging of lithium-ion batteries. Built from durable steel and equipped with integrated, maintenance-free fire suppression, it helps you charge everyday equipment with greater confidence in workshops, offices, and shared environments.

- Integrated automatic fire suppression for lithium-ion battery charging
- Robust steel cabinet with secure espagnolette lock and spring-loaded hinges
- Built-in 230 V charging outlets with plug-and-play setup
- Perforated shelves with prepared cable routing for tidy, effective charging
- IP-rated electrical components for reliable use in demanding environments

Integrated automatic fire suppression for lithium-ion battery charging

Laden 3 includes Stixx PRO passive fire suppression units that activate automatically at high temperature. The system is pressureless and designed to trigger at 170 °C, helping to contain an incident even if the power goes out. The cabinet design supports effective dispersion of the extinguishing agent through the internal structure.

Robust steel cabinet with secure espagnolette lock and spring-loaded hinges

The cabinet is constructed from durable metal and built to stay closed when it matters. A strong espagnolette lock helps keep the door secured during a fire, while spring-loaded hinges reduce the risk of the door being left open in daily use and help keep the extinguishing agent contained even if the cabinet has not been locked.

Built-in 230 V charging outlets with plug-and-play setup

Laden 3 is designed to be easy to put into service. With built-in 230 V outlets, you can connect chargers inside the cabinet and start charging without complex installation, making it suitable for workplaces and shared charging areas.

Perforated shelves with prepared cable routing for tidy, effective charging

Perforated shelves support airflow and help distribute the extinguishing agent effectively within the cabinet. The shelves are also prepared for cable routing, making it easier to organize multiple chargers and devices while keeping cables managed and out of the way.

IP-rated electrical components for reliable use in demanding environments

The cabinet's electrical components are IP-rated, supporting dependable operation across a wide range of environments. This makes Laden 3 suitable for varied indoor settings where durability and reliable electrical protection are important.

Package includes

- 1x Charging cabinet MAUS Laden 3 with integrated automatic fire suppression (Stixx PRO units) - Red
- Built-in 230 V outlets

Product specifications

- Brand: MAUS
- Colour: Red
- Product name: Laden 3 - Charging Cabinet
- Article number: 7003-1
- Application: Charging lithium batteries for power tools, electric bikes, electric scooters, and more
- Fire suppression activation temperature: 170 °C ± 10 °C
- Discharge time: 5 s or less
- Coverage volume: 6 m³
- Operational temperature: -30 °C to 70 °C
- Power: Built-in 230 V outlets
- Product life: 5 years (shelf life 6 years)
- Certifications: CE 2829
- Construction: Lockable steel cabinet with perforated shelves and cable routing support
