MAUS Stixx PRO HDC cable 50 meters with 20 connectors

The MAUS Stixx PRO HDC cable is designed to extend automatic fire protection in larger or more complex enclosed spaces. With 50 meters of heat detection cable and 20 connectors included, it enables efficient installation and reliable activation of multiple compatible MAUS Stixx PRO units from a single heat event.

- Heat detection cable activates at approximately 170 degrees Celsius
- Connects multiple compatible MAUS Stixx PRO units for wider coverage
- Flexible routing supports efficient installation in confined and irregular spaces
- Passive design requires no power and no ongoing maintenance
- Ideal for electrical cabinets, battery systems, vehicles, boats, and technical spaces

Heat detection cable activates at approximately 170 degrees Celsius
The cable is designed to respond when temperatures reach around 170 degrees Celsius. Once activated, it triggers the connected MAUS Stixx PRO units quickly, helping protect the entire enclosure at the moment overheating occurs.

Connects multiple compatible MAUS Stixx PRO units for wider coverage
This cable makes it possible to create a series connection between multiple compatible units, including MAUS Stixx PRO V1, Pro 5, and Pro 10. It is a practical solution when a single unit is not enough and broader protection is needed across a longer or more complex area.

Flexible routing supports efficient installation in confined and irregular spaces
The cable can be routed along walls, around components, beside wiring, or through key risk zones. This gives you the flexibility to adapt the installation to the layout of the space and place heat detection exactly where it is most effective.

Passive design requires no power and no ongoing maintenance
The MAUS Stixx PRO HDC cable works without external power, making it a dependable choice for technical environments where simplicity and reliability matter. Its passive construction also helps reduce maintenance requirements over time.

Ideal for electrical cabinets, battery systems, vehicles, boats, and technical spaces
This cable is well suited to environments where heat can build up in several different points within one enclosed space. Typical applications include electrical panels, battery cabinets, charging stations, server racks, control cabinets, vehicles, boats, and motorhomes.

Product specifications:

- Brand: MAUS
- Product name: Stixx PRO HDC cable 50 meters with 20 connectors
- Cable length: 50 m
- Number of connectors: 20
- Activation temperature: approximately 170 degrees Celsius
- Compatible with: MAUS Stixx PRO V1, Pro 5, and Pro 10
- Power requirement: none
- Installation type: passive heat detection cable for series connection of multiple units

Package includes:

- 1 x MAUS Stixx PRO HDC cable, 50 m
- 20 x connectors

SPECIFICATIONS

Carton: 1/1
Item ID: 1312-1
EAN: 7350015530263
Size: 120 x 60 x 120 mm
Weight: 350 g
