MAUS Stixx PRO HDC Crimping Tool - for art no 1312-1

The MAUS Stixx PRO HDC Crimping Tool is a precision tool developed for safe and professional installation of MAUS HDC Cable. It helps create a secure and tight crimp every time, supporting reliable activation and long-term performance in fire protection systems used in demanding environments.

- Specially designed for MAUS HDC Cable
- Accurate and secure crimping
- Durable steel construction
- Ergonomic handle for comfortable use
- Suitable for MAUS Stixx PRO V1, Stixx 5 and Stixx 10 systems

Specially designed for MAUS HDC Cable
This crimping tool is developed specifically for MAUS HDC Cable, also known as Heat Detecting Cable. Because it is made for this exact application, it supports correct assembly and helps ensure that the cable ends are prepared properly for dependable system performance.

Accurate and secure crimping
A correct crimp is essential for safe and reliable function in an automatic fire protection system. This tool delivers the precision needed to create a tight and consistent crimp, helping reduce installation errors and supporting proper activation when it matters most.

Durable steel construction
Made from high-quality steel, the tool is built for repeated professional use. Its robust construction gives installers and technicians the strength and reliability needed for demanding work in vehicles, electrical cabinets, battery compartments and industrial environments.

Ergonomic handle for comfortable use
The handle is designed to provide a secure and comfortable grip during use. This improves control and precision while making the tool easier to work with over longer installation sessions or repeated applications.

Suitable for MAUS Stixx PRO V1, Stixx 5 and Stixx 10 systems
The tool is intended for installation work connected to MAUS Stixx PRO V1, Stixx 5 and Stixx 10 systems. It is a practical choice for professionals who need a dependable tool that supports correct cable preparation across several MAUS fire protection applications.
