Velore leather with DriTan™ technology
Velore leather is made from fine-grained Danish calfskin using DriTan™ waterless tanning technology. This process eliminates water waste and produces soft, durable leather. With use, the leather develops a distinctive patina, adding warmth and character to your case.

Precision-machined metal camera ring and buttons
The precision-machined metal camera ring helps protect the camera, while the metal side buttons provide a satisfying, responsive click. Both add durability and complement the case's minimalist design.

Japanese microfiber lining
A premium Japanese microfiber lining protects your iPhone 17 Air inside the case. The lightweight, recycled fabric has a soft, silky finish.

MagSafe compatible
Integrated high-performance magnets support fast wireless charging and compatibility with all MagSafe accessories, without compromising the case's slim design.

Raised edge for added protection of your phone's screen
A 1 mm raised leather edge helps protect the screen from scratches and bumps. The case also covers the bottom of the phone without obstructing the charging port, maintaining a clean, continuous design.

Recycled materials and B Corp certification
Mujjo is B Corp certified and continues to work towards improved sustainability. This iPhone 17 Air case uses recycled materials in its metal buttons, camera ring, microfiber lining and leather-wrapped polycarbonate shell to help reduce its environmental footprint.
