UAG Plasma XTE case for Samsung S25 – Provides robust protection against shocks - Black/Orange

Urban Armor Gear Plasma XTE case for Samsung S25 provides robust everyday protection in a slim, lightweight design. Built with reinforced corners, a raised screen surround, and a strong magnetic module for wireless charging, it’s designed for secure grip, confident handling, and convenient hands-free viewing.

- Magnetic module for wireless charging and magnetic accessories
- Integrated metal kickstand for portrait and landscape viewing
- Reinforced impact protection with shock-absorbing corners
- Raised screen surround for added screen protection
- 6 m drop protection with MIL-SPEC tested durability

Magnetic module for wireless charging and magnetic accessories
The built-in magnetic module helps your Galaxy S25 align reliably with compatible wireless chargers and magnetic accessories. It supports MagSafe and Qi charging, works with most wireless chargers, and remains compatible with Samsung Pay for everyday use.

Integrated metal kickstand for portrait and landscape viewing
A sturdy metal kickstand is integrated into the case, making it easy to prop your phone up for video calls, streaming, reading, or taking hands-free photos. Switch between portrait and landscape depending on what you’re doing, without needing a separate stand.

Reinforced impact protection with shock-absorbing corners
The Plasma XTE is engineered to handle real-world drops and bumps. Reinforced TPU bumpers and air-soft corners help absorb and disperse impact forces, while the featherlight composite structure maintains a secure, protective fit without unnecessary bulk.

Raised screen surround for added screen protection
A raised edge around the screen helps reduce the chance of scratches and contact damage when placing your phone face down on tables or counters. It adds a practical layer of protection for daily use without affecting swipe gestures or handling.

6 m drop protection with MIL-SPEC tested durability
Designed for demanding conditions, the case is independently tested to withstand drops up to 6 m. It also meets Military drop test standards MIL-SPEC 810G-516.6, helping protect your device against shocks and accidental impacts.
