

ALOGIC Elements PRO USB-A to Lightning charging and synchronization cable - Black

Stay powered and connected every day with the ALOGIC Elements PRO USB-A to Lightning cable. Built for demanding homes, offices and on-the-go lifestyles, this 2-metre cable delivers fast charging and reliable data transfer while remaining exceptionally flexible and long-lasting. It is the perfect everyday companion for your Apple devices.

- Fast and reliable charging for your Apple devices
- Ultra-durable double-braided construction
- Highly flexible design with exceptional bend life
- Robust, compact connectors for tight spaces
- Certified performance with 2-year warranty peace of mind

Fast and reliable charging for your Apple devices

The Elements PRO USB-A to Lightning cable is engineered to deliver fast, dependable charging and smooth data synchronization for your Apple devices. Whether you are powering up your iPhone, iPad or iPod, the cable ensures your devices receive stable power for quick and efficient charging. With support for data transfer rates up to 480 Mbps, you can back up files, sync media and transfer documents without delays, making it ideal for both work and everyday use.

Ultra-durable double-braided construction

Designed for everyday toughness, this cable features a strong double-braided outer jacket that protects it from the stresses of regular use. The durable fabric braiding and reinforced insulation safeguard the internal wiring against pulling, twisting and general wear, helping prevent fraying and breakage over time. This robust build gives you a cable you can rely on day after day, even in busy households and shared office environments.

Highly flexible design with exceptional bend life

Despite its strength, the Elements PRO is impressively flexible. The combination of TPE materials and braided sleeving allows the cable to bend, twist and fold without stiffness, making it easy to store in bags, pockets or drawers. It is rated to withstand more than 30,000 bends, so you can use it confidently in demanding setups, from desks and bedside tables to car chargers, without worrying about premature failure.

Robust, compact connectors for tight spaces

Both ends of the cable are housed in rugged, bendable connector shells designed to handle frequent plugging and unplugging. The compact connector design makes it easier to fit into confined areas, such as behind furniture, in tight wall sockets or in busy multi-port charging stations. This thoughtful connector construction helps prevent damage at the most common stress points, extending the overall life of the cable.

Certified performance with 2-year warranty peace of mind

Every cable in ALOGIC's Elements PRO range is certified for safety and reliable performance, so you can charge and sync with confidence. The quality components and construction are backed by a 2-year warranty, reflecting ALOGIC's commitment to long-lasting products. Whether you use it at home, in the office or on the move, you get a dependable cable designed to perform day after day.

Package includes

- ALOGIC Elements PRO USB-A to Lightning charging and synchronization cable, 2 m - Black
- Warranty and user documentation

Product specifications

- Brand: ALOGIC
- Product name: Elements PRO USB-A to Lightning charging and synchronization cable
- Colour: Black
- Cable length: 2 metres
- Input connector: USB-A (USB 2.0)
- Output connector: Lightning
- Data transfer rate: up to 480 Mbps
- Cable material: TPE with fabric double-braided sleeving
- Compliance: CE, FCC
- Device compatibility: Apple devices with Lightning connector
- Port compatibility: USB-A chargers, computers and power adapters
- Bend rating: tested to more than 30,000 bends
- Warranty: 2 years
