ALOGIC Powerfin 7-Port USB-C Desktop Charging Station

Keep shared devices charged, organised and ready to use with the ALOGIC Powerfin 7 Port USB-C Desktop Charging Station. Designed for desks, counters and shared spaces, it delivers reliable power for up to seven phones or tablets at once while keeping each device neatly stored and easy to access.

- Charges and stores up to 7 devices at the same time
- Delivers up to 20W per port with 80W total output
- Designed for phones and tablets, including devices in cases up to 19 mm thick
- Ideal for shared environments such as offices, schools, hospitals and homes
- Includes 7 short USB-C charging cables for a tidy desktop setup

Charges and stores up to 7 devices at the same time
The charging station combines power delivery with practical device storage, making it easy to keep multiple phones and tablets together in one place. The top-mounted slots help organise devices while they charge, reducing desk clutter and making devices easy to pick up when needed.

Delivers up to 20W per port with 80W total output
Unlike basic multi-port chargers that split power too heavily, this unit is built to provide strong and dependable charging across connected devices. Each port can deliver up to 20W when used individually, with a total maximum output of 80W, making it suitable for everyday charging in busy shared spaces.

Designed for phones and tablets, including devices in cases up to 19 mm thick
The charging bays are made to accommodate a wide range of mobile devices, including phones and tablets from major brands. They also support devices with cases up to 19 mm thick, so there is no need to remove most protective covers before charging.

Ideal for shared environments such as offices, schools, hospitals and homes
This charging station is well suited to any location where several devices need to be charged in one central place. It offers a practical solution for reception desks, classrooms, staff areas, study spaces and family homes, helping keep devices secure, visible and ready for use.

Includes 7 short USB-C charging cables for a tidy desktop setup
Included 22 cm USB-C to USB-C cables are designed to bridge the short distance between the charging station and each device without creating unnecessary cable mess. This helps maintain a clean and efficient workspace while making setup simpler straight out of the box.

Package includes

- 1 x ALOGIC Powerfin 7 Port USB-C Desktop Charging Station
- 1 x EU power cable
- 1 x UK power cable
- 7 x USB-C to USB-C charging cables
- 1 x user manual

Product specifications

- Brand: Alogic
- Part number: SB-DCS7C
- Input: 110 to 240V AC
- Output: 7 x USB-C PD 3.0, 5 to 9V
- Total maximum output: 80W
- Port performance: Ports 1 and 2, 3 and 4, and 5 and 6 operate in pairs. Each port supports up to 20W when used individually, or 20W shared output when both ports in the pair are used together. Port 7 supports standalone 20W output
- Efficiency: Includes Power Factor Correction technology
