# Mujjo Leather Case for iPhone 16 - Tan

Mujjo's Leather Case for iPhone 16 in Tan combines premium European leather with recycled materials in a durable, minimalist design. Responsive metal buttons, a protective camera surround and a soft microfibre lining provide practical protection with a refined finish.

- Premium European leather
- Machined metal buttons
- Machined metal camera surround
- Japanese microfibre lining
- MagSafe compatible
- B Corp certification

**Premium European leather**
Crafted from northern European hides, the leather is tanned in the Netherlands using the DriTan process, which reduces water waste and chemical use. The durable leather develops a distinctive patina over time, adding character to your case.

**Machined metal buttons**
The machined metal side buttons deliver a responsive, satisfying click and are coloured to match the Tan leather. Their finish complements the case's minimalist design. Cases for the iPhone 16 models include a mute button and a one-piece volume button.

**Machined metal camera surround**
A machined recycled aluminium camera surround protects the rear camera lenses and adds durability. It provides robust protection against bumps and scratches in an area where leather is more susceptible to damage.

**Japanese microfibre lining**
The interior is lined with premium Japanese microfibre. This thin, lightweight recycled fabric has a soft, satin-like finish, providing gentle cushioning and protection for your iPhone.

**MagSafe compatible**
Built-in magnetic technology supports fast wireless charging and compatibility with all MagSafe accessories.

**A focus on sustainability**
Mujjo's B Corp certification reflects its commitment to improving sustainability. These iPhone cases use recycled materials in the metal buttons, camera surround, microfibre lining and the polycarbonate shell beneath the leather.

**Package includes**
