Ultra-thin no-case feel

PhoneBack is designed to feel as close as possible to using your iPhone without a case. With a slim profile of just 2.3 to 4 mm and a low weight of 44 to 54 g, it adds protection and grip without making the phone feel bulky in your hand or pocket.

Secure MagSafe hold with PerfectLock

Built with PerfectLock, Süti's advanced neodymium magnet array, PhoneBack provides a strong and stable magnetic connection. It is fully compatible with MagSafe accessories and wireless charging, so you can charge and use your everyday accessories without removing the cover.

No adhesives and easy to swap

PhoneBack attaches without glue or residue. You can remove it cleanly, change styles when you want and keep your iPhone looking fresh without committing to one permanent finish.

Camera and back-panel protection

The cover helps protect the iPhone's camera area and shields the back panel from everyday scratches. It is made for users who want discreet protection while keeping the original iPhone design visible and accessible.

Premium material options

Choose from a range of carefully selected finishes, each with its own feel and character. Silicone offers a grippy, waterproof and durable surface. NanoLeather provides a soft vegan leather finish. NanoSuede gives a plush, stain-resistant texture. Walnut Wood uses a micro-thin natural veneer that develops character over time. Clear keeps the iPhone's original look visible, while Carbon Fiber offers a lightweight and strong finish with a smooth texture.
