- B Corp certification

Velore Leather with DriTan™ Technology
Velore leather is crafted from fine-grain Danish calfskin using waterless DriTan™ technology. This tanning process eliminates water waste and produces smooth, durable leather. Over time, the leather develops a distinctive patina, adding warmth and character to the case.

Machined Metal Camera Bump & Buttons
The camera bump and side buttons are made from machined metal for protection and enhanced durability. The buttons deliver a responsive, satisfying click, while the metal details complement the case's minimalist design.

Japanese Microfibre Lining
The interior is lined with premium Japanese microfibre. This lightweight, satin-soft recycled fabric cushions your iPhone 17 Air with a smooth, protective finish.

MagSafe Compatible
Integrated high-performance magnetic technology supports fast wireless charging and compatibility with all MagSafe accessories.

Screen Protection with Raised Bezel
A 1 mm raised leather bezel helps protect the screen from scratches and impacts. The case also covers the base of your phone without obstructing the charging port, maintaining a clean profile.

Sustainability and Recycled Materials
Mujjo is B Corp certified and continues to work towards improved sustainability. This iPhone 17 Air case uses recycled materials in its metal buttons, camera bump, microfibre lining and the polycarbonate shell beneath the leather, helping to reduce its environmental footprint.
