- Premium European Leather
- Machined-Metal Buttons
- Machined-Metal Camera Bump
- Japanese Microfibre Lining
- MagSafe Compatible
- B Corp sustainability certificate

Premium European Leather
Experience the best in luxury with our Mujjo Leather Case for iPhone 16 Pro, crafted from northern European hides. This leather is tanned in the Netherlands using the DriTan process, reducing water waste and chemical usage, making it highly durable and sustainable. As it ages, the leather develops a unique patina, adding character to your case.

Machined-Metal Buttons
The side buttons are meticulously crafted from machined metal for optimal responsiveness. They provide a super-satisfying clickiness and are dyed to match the rich Black leather. This attention to detail aligns with our minimalist design philosophy. Cases for the iPhone 16 Pro models come with a mute button and a one-piece volume button for enhanced functionality.

Machined-Metal Camera Bump
A machined recycled aluminum camera bump safeguards the rear camera lenses. This beautifully designed piece of hardware protects the camera and enhances the case's overall durability. Aluminum provides robust protection, whereas leather can be susceptible to damage from bumps and scratches.

Japanese Microfibre Lining
Inside the Mujjo Leather Case, you’ll find a lining made from premium Japanese microfibre. This slim, super-soft recycled fabric is incredibly lightweight and has a satin-like finish. It offers luxurious padded comfort for your iPhone 16 Pro and ensures that your phone is cradled in elegance and protection.

MagSafe Compatible
Stay connected and powered up with ease. The Mujjo Leather Case integrates magnetic technology for fast wireless charging and seamless compatibility with all MagSafe accessories. This feature allows you to enjoy the convenience of modern tech while maintaining a stylish look.

Even more sustainable
B Corp certification means we’re always looking for new ways to improve sustainability. These new iPhone cases are packed with recycled materials, including the metal buttons, camera bump, microfibre lining, and polycarbonate shell around which the leather is wrapped.

Package includes
