

myFirst Thermal Paper for Insta 2 Camera

Bring your mini prints to life with bold, eye-catching colors. This dual-color thermal paper is made for fast, mess-free printing on the myFirst Camera Insta 20, delivering sharper detail, richer contrast, and fun color effects that make every shot pop.

- Dual-color effects for vivid, high-contrast prints
- Sharp, high-density output on a smooth surface
- Free-end roll for quick, clean loading
- Long-lasting rolls with up to 60 prints each
- Designed for myFirst Camera Insta 20 with the latest software

Dual-color effects for vivid, high-contrast prints

Each roll features built-in dual-color printing options in Black plus Blue, Black plus Red, or Black plus Orange. These combinations add depth and contrast so your stickers, notes, and snapshots stand out instantly without ink or toners.

Sharp, high-density output on a smooth surface

Engineered for clarity, the paper produces crisp, detailed lines and text. The smooth surface helps your camera's thermal head deliver clean results with consistent tones and fewer artifacts.

Free-end roll for quick, clean loading

A free-end design makes swapping rolls simple and frustration-free. Just drop in, feed, and print. No tearing, no wasted paper, and no complicated setup.

Long-lasting rolls with up to 60 prints each

Each 6 m roll yields up to 60 prints, giving you plenty of room to create, journal, and share. With three rolls in the pack, you can keep printing longer between replacements.

Designed for myFirst Camera Insta 20 with the latest software

Optimized for the myFirst Camera Insta 20, this paper works best with software version 20250410 V1.0 or newer to ensure accurate color effects and top print quality.

Package includes

- 3 rolls of dual-color thermal paper
