

Satechi SM3 Slim Mechanical Backlit Bluetooth Keyboard US English Layout - Light Grey

The Satechi SM3 Slim Mechanical Backlit Bluetooth Keyboard is designed for precise, comfortable typing across your everyday devices. With a full-size 108-key layout, tactile low-profile mechanical switches, flexible multi-device connectivity, and a slim aluminum design, it brings a refined typing experience to both work and home setups.

- Full-size 108-key layout with numeric keypad
- Low-profile brown mechanical switches for quiet tactile typing
- Connect up to four devices with Bluetooth, 2.4 GHz, and USB-C
- Adjustable white backlighting with 14 lighting patterns
- Slim aluminum design with adjustable typing angle

Full-size 108-key layout with numeric keypad

The full-size layout gives you the keys you need for efficient daily work, including a dedicated numeric keypad for spreadsheets, finance tasks, data entry, and other number-focused workflows. It is a practical choice for office, business, and productivity setups where accuracy and speed matter.

Low-profile brown mechanical switches for quiet tactile typing

Low-profile brown mechanical switches provide a responsive, tactile feel while keeping typing noise controlled. The result is a comfortable typing experience suited to long work sessions, shared spaces, and users who prefer mechanical feedback without a loud keystroke.

Connect up to four devices with Bluetooth, 2.4 GHz, and USB-C

The keyboard supports flexible connectivity for modern workstations. Connect up to two devices via Bluetooth 5.0, one device with the included 2.4 GHz USB receiver, and one device using the USB-C cable in wired mode. Switch easily between Mac, iPad, iPhone, and Windows devices to keep your workflow moving.

Adjustable white backlighting with 14 lighting patterns

White backlighting improves visibility in different lighting conditions and adds a clean finish to your desk setup. Choose from 14 lighting patterns, three brightness levels, and four LED speeds to match your workspace and preference.

Slim aluminum design with adjustable typing angle

The slim aluminum enclosure gives the keyboard a premium, minimalist look while keeping it suitable for everyday use. Adjustable feet let you set a more comfortable typing angle, helping reduce strain on your wrists and hands during longer sessions.
