

The Sensibo Sky is the ultimate solution to smart temperature control at home or in the office. It simplifies managing your heating and cooling systems, offers remote monitoring and automation, and leads to energy-saving practices. It provides seamless compatibility with Amazon Alexa and Google Assistant, making your air conditioner conveniently voice-controlled. The Sensibo Sky embraces technology that converges with simplicity and environmental friendliness, giving you effortless control right from the palm of your hand, no matter where you are.

- Complete control of your air conditioner
- Works globally
- Remote AC control
- Energy-saving automation
- Open API and IFTTT integration

Complete control of your air conditioner

The Sensibo Sky transforms your standard air conditioner or heat pump into a smart device. It ties control, monitoring, and scheduling of numerous devices into a single app. It fosters sharing among family members at home and colleagues in the office, scaling up comfort to everyone's benefit.

Works globally

Be it any country, any voltage or power outlet, Sensibo Sky extends its compatibility universally. Its installation is a breeze, preparing your device for intelligent climate management in less than a minute.

Remote AC control

Your AC is now at your command from any corner of the globe. Keep an eye on temperature and humidity from afar, ensuring ideal climatic conditions as if you were there.

Energy-saving automation

With Sensibo Sky, energy efficiency meets automation. Using your phone's location, it sets up the AC to turn on before your arrival and shuts it off when everyone leaves. Embrace hassle-free temperature maintenance while reaping energy savings.

Open API and IFTTT integration

The Sensibo Sky signifies adaptability with its extensive open API that accommodates community-created extensions and integrations for SmartThings, OpenHab, Homebridge (for HomeKit) and more. Pair it with IFTTT to help you create unique recipes and new automation.

Package includes

- 1 x Sensibo Sky device (White)

Product specifications

- Supported ACs & Heat Pumps: Works with any air conditioner or heat pump having a remote control.
- Sensors: Equipped with high-accuracy temperature and humidity sensors.
- Dimensions (WxLxH): Measures 3.23" x 2.17" x 0.67".
