iotty Smart 1-gang Switch (No faceplate)

Iotty Smart 1-gang light switch without faceplate, with app control and support for Google Home and Alexa
Control your lighting from your phone, set schedules around your day and keep manual control close at hand. The Iotty Smart Switch LSWE21 combines touch operation with app control and smart home integration in a clean, Italian-designed solution. A single-button faceplate is required and sold separately. Installation requires both Line and Neutral wires.

- Control lighting from your phone or by touch
- Replace your existing wall switch
- Choose settings that suit your installation
- Automate your lighting and monitor energy use
- Connect with Google Home, Alexa and more

Control lighting from your phone or by touch
Use the Iotty app for Android and iOS to manage your lighting and connected devices wherever you are. At home, touch control makes everyday operation simple. Manual operation works even without Wi-Fi, so you can still switch your lights on and off when your internet connection is unavailable.

Replace your existing wall switch
Upgrade an existing wall switch with smart control and a clean finish. The LSWE21 is designed for installations with both Line and Neutral wires available. Complete the switch with a compatible Iotty single-button faceplate, sold separately, and choose a colour that suits your room.

Choose settings that suit your installation
Configure the switch for standard on and off operation or use push-button mode, where power flows only while the button is pressed. For control from more than one location, Wi-Fi multi-way switching lets multiple Iotty switches work together. These options help you adapt the controls to different rooms and everyday routines.

Automate your lighting and monitor energy use
Set your lighting to respond to your schedule, location, sunrise, sunset or local weather conditions. Away mode can simulate activity while you are out, while energy consumption monitoring helps you keep track of connected devices. You can also dim the switch backlight to suit the room and time of day.

Connect with Google Home, Alexa and more
Integrate the switch with Google Home or Amazon Alexa for convenient voice control. Support for Siri Shortcuts, SmartThings and IFTTT gives you more ways to connect your lighting with your existing smart home setup. Designed entirely in Italy, the switch combines a considered finish with CE compliance and TÜV approval.

Product specifications
