iotty Smart 1-gang Switch - Black

Bring connected control to your lighting with the Iotty Smart Switch. Built-in Wi-Fi lets you manage your lights through the app, use voice commands and create routines without a separate hub. Designed in Italy, it combines a clean, modern finish with practical features for everyday comfort and control.

- Built-in Wi-Fi with no hub required
- App and voice control
- Flexible schedules and smart automation
- Energy monitoring and activity notifications
- Italian design with adjustable backlighting

Built-in Wi-Fi with no hub required
Replace your existing switch with Iotty and connect it to your Wi-Fi through the app. With connectivity built into the switch, there is no need for a separate hub or central control unit.

Use Wi-Fi to create multi-way switching, allowing you to control the same lighting from different switches. You can also configure a central button to control several Iotty switches together.

App and voice control
Keep your Iotty switches under control from one intuitive app. Manage your lighting, personalise settings and create scenes that send multiple commands with a single tap.

For hands-free control, Iotty works with Amazon Alexa and Google Assistant. IFTTT support gives you additional ways to connect your lighting with other services and routines. You can also share access to selected switches with other users.

Flexible schedules and smart automation
Set your lights to turn on at a specific time, at sunrise or sunset, or in response to weather conditions. Location-based automation can switch on your lighting when you enter a chosen geographical area.

Away Mode turns lights on at random to make your home appear occupied while you are out. Android users can also trigger actions when their smartphone connects to a specified Wi-Fi network.

Energy monitoring and activity notifications
Monitor energy consumption in the Iotty app to better understand how your lighting is used. Keep track of usage and make informed decisions about your lighting routines.

Notifications let you know when a light turns on or off, helping you stay aware of activity without checking the switch yourself.

Italian design with adjustable backlighting
Designed in Italy, the Iotty Smart Switch adds a refined, modern finish to your walls. Choose a black or white faceplate to suit your interior.

Adjust the backlight brightness through the app and program when it turns on, giving you control over both the lighting and the appearance of the switch.

Package includes

- 1 x Iotty Smart single-gang switch with built-in Wi-Fi

Product specifications

- Brand: Iotty
- Product type: Single-gang smart switch
- Connectivity: Built-in Wi-Fi
