iotty Smart 1-gang Switch - White

Bring connected control to your lighting with the Iotty Smart Switch. Built-in Wi-Fi lets you manage your switch through the app, set schedules and use voice commands without a separate hub. Designed in Italy and available in black or white, it brings a refined finish to your walls.

- Built-in Wi-Fi with no hub required
- Voice control and one-tap scenes
- Automated lighting that fits your routine
- Energy monitoring and shared access
- Italian design with adjustable backlighting

Built-in Wi-Fi with no hub required
Replace your existing switch with Iotty and connect it to your Wi-Fi through the app. There is no need for a separate hub or central unit. Wi-Fi also lets you link Iotty switches for multi-way switching or create a central button to control several switches together.

Voice control and one-tap scenes
Control your switch with Amazon Alexa or Google Assistant, and use IFTTT to create connected automations. Set up scenes to send several commands with a single tap, making everyday routines easier to manage.

Automated lighting that fits your routine
Schedule your lighting for specific times, sunrise or sunset. Create actions based on the weather or your location, so lights can switch on when you enter a chosen area.

Away Mode switches lights on randomly to give the impression that someone is home. On Android, you can also trigger your switch when your smartphone connects to a specific Wi-Fi network.

Energy monitoring and shared access
Keep track of energy consumption in the Iotty app and receive notifications when a light switches on or off. Share access to your switch with another user so household members can control it too.

Italian design with adjustable backlighting
Designed in Italy, Iotty combines a clean, modern faceplate with app-controlled backlighting. Schedule the backlight or adjust its brightness to suit your room. Choose black or white to complement your interior.

Package includes

- 1 x Iotty Smart single-gang switch with built-in Wi-Fi - white

Product specifications
