

The lotty Smart Switch brings elegant design and practical smart home control together in one connected solution. With built in Wi-Fi and no hub required, it helps you manage lighting and other connected functions with greater convenience, flexibility and control from the app or with voice commands.

- Built in Wi-Fi with no hub required
- Smart automation based on time, location, sun and weather
- Energy monitoring and real time notifications
- Voice control with Amazon Alexa, Google Assistant, Siri Shortcuts and IFTTT
- Premium Italian design with customisable backlight and faceplate options

Built in Wi-Fi with no hub required

lotty connects directly to your Wi-Fi network, so there is no need for a separate hub or central control unit. Once installed in place of your existing switch, it can be set up through the app for quick access to smart controls throughout your home.

Smart automation based on time, location, sun and weather

The switch can be programmed to respond automatically to your routine and surroundings. Turn lights or connected devices on at a specific time, at sunrise or sunset, when you enter a selected area, or based on local weather conditions. This makes it easier to create a home that feels responsive and efficient every day.

Energy monitoring and real time notifications

lotty helps you keep track of energy consumption so you can better understand and manage usage. You can also receive notifications when a light turns on or off, giving you more visibility and control whether you are at home or away.

Voice control with Amazon Alexa, Google Assistant, Siri Shortcuts and IFTTT

Control your switch with simple voice commands or connect it to wider smart home routines. lotty works with Amazon Alexa, Google Assistant, Siri Shortcuts and IFTTT, making it easy to integrate into your preferred smart home setup and create customised actions.

Premium Italian design with customisable backlight and faceplate options

Designed in Italy, the lotty Smart Switch is made to deliver both function and style. Its clean, modern appearance adds a refined finish to the wall, while the programmable backlight allows you to adjust brightness to suit your space. Faceplates are available in black and white so you can choose the look that fits your interior.
