Sensibo Sky smart AC controller for air conditioning and heat pumps with app control and automation gives you simple, precise control of your indoor climate from anywhere. Connect your compatible air conditioner or heat pump, manage it through the Sensibo app, automate daily use, and reduce unnecessary energy consumption without replacing your existing system.

- Smart control for air conditioners and heat pumps
- Remote control from anywhere
- Automatic climate control and energy savings
- Shared access for home or office use
- Voice assistant, open API and IFTTT integration

Smart control for air conditioners and heat pumps

Sensibo Sky turns a standard air conditioner or heat pump with a remote control into a smart climate device. From one app, you can control multiple units, monitor temperature and humidity, create schedules, and manage comfort across different rooms, homes, or office spaces.

Remote control from anywhere

Control your air conditioner from your phone, wherever you are. Sensibo Sky lets you check room temperature and humidity remotely, adjust settings before you arrive, or switch the system off if it has been left running.

Automatic climate control and energy savings

With location-based automation, Sensibo Sky can turn your air conditioner on before you arrive and switch it off when everyone leaves. Unlimited 7-day scheduling also lets you set routines for mornings, nights, workdays, and weekends, helping reduce energy use while keeping your space comfortable.

Shared access for home or office use

Sensibo Sky can be shared with family members at home or colleagues at work. Each device can be matched to a specific air conditioner, making it easy for everyone with access to manage the right unit from the app.

Voice assistant, open API and IFTTT integration

Sensibo Sky works with Amazon Alexa and Google Assistant for convenient voice control. It also supports IFTTT and offers an open API, with integration options for platforms such as SmartThings, OpenHab and Homebridge for HomeKit.

Package includes

- 1 x Sensibo Sky device
- USB cable
- Power adapter
- Mounting kit

Product specifications

- Brand: Sensibo
- Colour: Black
- Product name: Sky smart AC controller for air conditioning and heat pumps with app control and automation
- Supported systems: Air conditioners and heat pumps with a wireless infrared remote control
- Remote control range: Up to approximately 6 m with clear line of sight
- Sensors: High-accuracy temperature and humidity sensors
