Süti NanoSuede PhoneBack for iPhone 17 Pro - Sandstone

Suti PhoneBack is a slim magnetic iPhone cover designed for those who want protection without changing the feel of their iPhone. It keeps the design visible and comfortable in hand, while adding grip, camera protection and full MagSafe compatibility.

- Ultra thin profile with a natural no case feel
- Strong MagSafe hold with PerfectLock magnets
- No adhesives and easy style swapping
- Camera and back panel protection with added grip
- Premium material options for different finishes

Ultra thin profile with a natural no case feel
PhoneBack is designed to feel as close as possible to using your iPhone without a case. With a slim profile of 2.3 to 4 mm and a lightweight construction, it fits comfortably in your hand and slides easily into your pocket without adding unnecessary bulk.

Strong MagSafe hold with PerfectLock magnets
The integrated PerfectLock magnet system uses an advanced neodymium magnet array for a secure and reliable hold. It is fully compatible with MagSafe accessories and wireless charging, so you can charge and use your iPhone the way you are used to.

No adhesives and easy style swapping
PhoneBack attaches without adhesives, making it simple to remove or change styles whenever you want. It leaves no residue behind and keeps the back of your iPhone clean, smooth and protected.

Camera and back panel protection with added grip
The cover helps protect the camera area and shields the back panel from scratches during everyday use. It also adds grip, giving you a more confident hold while keeping the iPhone’s original shape and feel.

Premium material options for different finishes
Choose from a range of carefully selected materials to match your style and daily use. Silicone offers the strongest grip and a durable waterproof finish. NanoLeather provides a smooth vegan leather feel. NanoSuede has a soft, plush texture with stain resistance. Walnut Wood uses a micro thin natural walnut veneer that develops character over time. Clear keeps the iPhone’s original design visible while adding grip. Carbon Fiber is the lightest option, with a strong structure and smooth finish.
