- The original paper-feel screen protector, refined for creators
- Butterfly™ Application System

Paper-like feel for neater writing and precise sketches
Glass can feel slippery. Paperlike™ 3 uses a refined Nanodots™ surface to add controlled resistance, helping you place each stroke more precisely. It supports neater handwriting and more controlled sketches, with the natural feel of pen on paper while maintaining clarity and comfort.

Responsive Apple Pencil performance
Designed to stay below Apple's maximum screen protector thickness limit, Paperlike™ 3 maintains low latency and pixel-precise input for responsive writing, illustration and annotation.

Helps reduce Apple Pencil tip wear and protects your screen
Paperlike™ 3 balances surface friction with everyday protection. Its durable PET base and specialised surface help minimise Apple Pencil tip wear while shielding your iPad display from scratches, scuffs and fine marks during daily use.

Easy installation with dust removal
The Butterfly™ Application System combines a full-surface dust catcher, Clean Room Effect, precise alignment tools, a reusable Helper Tool and an interactive on-screen guide. Together, they help you align the protector accurately and achieve a clean finish with less dust.

The original paper-feel screen protector, refined for creators
This third generation of the original paper-feel screen protector has been refined through years of testing and feedback from creators. Engineered in Germany and manufactured in Switzerland, Paperlike™ 3 is trusted by over a million artists, students and professionals worldwide.

Butterfly™ Application System
Dust removal, alignment tools and on-screen guidance help make each step of installation straightforward.
