Interactive doctor kit for kids
Shifu Tacto Doctor isn't just another toy - it's an interactive doctor's kit developed in consultation with early-childhood educators to captivate your child with engaging, story-driven games. This comprehensive set introduces your child to the fascinating world of healthcare and medical science in an immersive and interactive environment that blends physical pieces with digital play for balanced, meaningful screen time. The 12 mini medical tool figurines magically spring into action when placed on your tablet screen, letting your child experience being a real physician. 1–2 players can enjoy the experience together, making it great for siblings or parent-child play.

Real STEM learning tool
While it's playtime for kids, it's valuable learning time too! Deeply rooted in STEM principles (Science, Technology, Engineering, and Mathematics), this game set helps children explore scientific concepts through hands-on pretend play. It builds understanding of basic medical procedures, health concepts, and first-aid techniques, transforming entertainment time into productive learning sessions that develop critical thinking, problem-solving, and practical knowledge.

Enhances pretend play
Thoughtfully designed to boost imagination, this play set elevates pretend play to new heights. Whether checking a patient's temperature or analyzing X-rays, each activity enhances your child's problem-solving abilities and builds knowledge through play. The best part? Each session introduces a new storyline, keeping your child consistently engaged and excited to learn more. Each session introduces a new storyline, keeping your child consistently engaged.

Stimulates cognitive development
Perfectly crafted for children ages 4-8, the set features 3 interactive games with over 100 progressive levels that stimulate cognitive development. The game set is built to make screen time meaningful by fostering independent learning and problem-solving through guided discovery.

Fosters social-emotional intelligence
Stepping into a doctor's role helps your child develop empathy, understand emotions, and respond appropriately—all critical aspects of social and emotional intelligence. Learning foundational medical concepts this way can also turn real doctor visits into friendlier, less stressful experiences for your child.

Available in Nordic Languages!
Full support in Swedish, Danish, and Norwegian, as well as English, makes this educational tool accessible to children across the Nordic region in their native languages.
Other languges supported: English, Japanese, French, German, Spanish, Korean, Slovenian.

Package includes
The Tacto Doctor set contains four plastic frames (which clip around your tablet to hold the figurines in place during play) and 12 unique figurines including a stethoscope, thermometer, medicine bottle, X-ray, bandage, flashlight, magnifier, scissors, spray, syringe, BP pump, and ultrasound—all designed to interact seamlessly with your tablet. A compatible tablet is required and not included — see specifications below.
