- Butterfly™ Application System

Paper-like resistance for neater writing and precise sketches
Paperlike™ 3 uses a refined Nanodots™ surface to add resistance to smooth iPad glass. This gives you more control over each stroke, helping you write neatly and sketch precisely with a comfortable, paper-like feel while maintaining screen clarity.

Responsive Apple Pencil performance
Designed to stay below Apple's maximum screen protector thickness limit, Paperlike™ 3 keeps latency low and input pixel-precise for responsive writing, illustration and annotation.

Helps reduce Apple Pencil tip wear and protects your screen
Paperlike™ 3 balances friction with protection. Its durable PET base and specialised surface help minimise Apple Pencil tip wear while shielding your iPad display from everyday scuffs, scratches and fine marks.

Easy, clean installation with dust removal
The Butterfly™ Application System combines a full-surface dust catcher, Clean Room Effect, precise alignment tools, a reusable Helper Tool and an interactive on-screen guide. Together, they help you remove dust, position the protector accurately and apply it cleanly.

The original paper-like screen protector, developed for creators
This third-generation screen protector has been refined through years of testing and feedback from creators. Engineered in Germany and manufactured in Switzerland, Paperlike™ 3 is trusted by over a million artists, students and professionals worldwide.

Butterfly™ Application System
A full-surface dust catcher, Clean Room Effect, alignment tools and on-screen guide support clean, accurate installation.
