# Paperlike Refillable Screen Cleaning Kit V2 with 5 Refill Pellets - Grey

Keep your screens clean with the Paperlike Cleaning Kit v2. This compact, refillable kit removes dust, dirt and skin oils and includes five refill pellets for an estimated 500+ cleaning sessions over its lifespan.

- Quickly removes dust, grime and skin oils
- Safe for all electronic devices
- Compact, portable all-in-one design
- Refillable for an estimated 500+ cleaning sessions
- Alcohol-free solution and waste-reducing refillable design

**Quickly removes dust, grime and skin oils**
The Paperlike Cleaning Kit v2 uses an oil-dissolving solution designed for frequently used electronics, including touchscreens. It quickly removes dust, dirt, grime and skin oils. When used with the Paperlike Screen Protector, it helps restore the texture and tactile feedback provided by Nanodots® technology for drawing and writing.

**Safe for all electronic devices**
The alcohol-free cleaning solution is rigorously tested for safe use on any electronic screen, including iPads, smartphones and computer monitors. It cleans without leaving residue or causing damage.

**Compact, portable all-in-one design**
The Cleaning Kit v2 combines a spray bottle and microfiber cleaning surface in one compact container. The redesigned spray head delivers a smoother, more consistent mist, while the microfiber exterior wipes screens clean without residue. The included hardshell case protects the spout and keeps the microfiber exterior clean during travel.

**Refillable for an estimated 500+ cleaning sessions**
The five included refill pellets provide an estimated 500+ cleaning sessions over the kit's lifespan. When the cleaning liquid runs out, remove the refillable bottle, add tap water and one refill pellet, then wait 10 minutes for the pellet to dissolve. Reassemble the spray bottle, and it is ready to use again.

**Alcohol-free solution and waste-reducing refillable design**
The cleaning solution is free from alcohol and harmful chemicals. The refillable design reduces waste by allowing you to reuse the bottle rather than replace it when the liquid runs out.
