Raises your MacBook screen and camera up to 55 cm

Lift your screen to eye level for a more natural posture and a cleaner video-call angle. With Curve Flex, your MacBook camera can sit higher on your desk setup, helping you look more centered on calls while keeping your display at a more comfortable viewing height.

Adjusts to a comfortable typing angle from 0 to 45 degrees

Set the keyboard angle that feels right for your wrists and shoulders. Whether you prefer a flat typing position or a steeper angle, Curve Flex gives you control so your laptop adapts to how you work.

Folds flat for easy travel and compact storage

Curve Flex is built to move with you. It folds down slim for packing in a bag and takes up minimal space when stored, making it a practical choice for hybrid work, commuting, or travel.
