

Transform your desk into an ergonomic, clutter-free workspace with HiRise Pro from Twelve South. This premium, height-adjustable stand lifts your iMac or Apple Display to eye level for a more comfortable viewing position, while creating a clever hidden compartment inside for drives, hubs and everyday essentials. Strong, stylish and designed specifically for iMac and Apple Displays, HiRise Pro is the elegant upgrade your desktop has been missing.

- Elevates your iMac or Apple Display to your ideal eye level
- Creates hidden storage to declutter your desktop
- Adjustable internal support shelf for perfect height alignment
- Designed specifically for all iMac and Apple Display models with L-shaped stand
- Premium metal construction with perforated, magnetically attached faceplates

### **Elevates your iMac or Apple Display to your ideal eye level**

The ideal position for your screen is at eye level, so you can sit upright instead of hunching over your desk. HiRise Pro lifts your iMac or Apple Display to a more natural, ergonomic viewing height, helping reduce neck and back strain during long work sessions. By raising your display instead of tilting it up from a low position, you enjoy a more balanced, comfortable posture and a cleaner, more professional-looking workspace.

### **Creates hidden storage to declutter your desktop**

HiRise Pro does more than just lift your Mac – it also hides your desk clutter. Behind its perforated front and rear panels is a discreet storage compartment, ideal for backup hard drives, USB hubs, a Mac mini, your wallet, keys or your phone. The perforations allow plenty of airflow to keep electronics cool, while keeping messy cables and accessories out of sight. Use it as a tidy tech garage or a secure stowaway for personal items, and enjoy a desktop that looks as clean as it functions.

### **Adjustable internal support shelf for perfect height alignment**

Inside HiRise Pro is a sturdy metal support shelf that can be placed in one of six internal positions. This lets you fine-tune the height of your iMac or Apple Display to match your body and your setup, instead of settling for a fixed stand height. Set it higher for standing desks, lower for seated setups, or align the height of your iMac with a secondary display, such as a Thunderbolt Display, for a seamless dual-monitor experience. Your Mac rests securely on the internal shelf, supported from within rather than simply sitting on top of a box.

### **Designed specifically for all iMac and Apple Display models with L-shaped stand**

HiRise Pro is purpose-built for iMac and Apple Displays that use Apple's classic L-shaped stand, including Thunderbolt Display and even the large 27-inch (approximately 68.6 cm) iMac. The interior dimensions and support structure are engineered to cradle the stand perfectly, keeping your Mac stable and secure. The robust metal frame easily supports the weight of larger models, while the refined design complements Apple's aesthetic, so it looks like a natural extension of your Mac – not an afterthought.

### **Premium metal construction with perforated, magnetically attached faceplates**

HiRise Pro features a solid, two-piece metal outer frame that is both strong and refined. Front and rear faceplates attach magnetically for easy access to the storage compartment, and can also be screwed in for a more permanent, secure fit. The perforations in the metal panels add a distinctive modern look while providing ventilation for any devices stored inside. On the underside, low-friction Teflon sliders let you pivot and reposition your iMac smoothly without scratching your desk surface, making it easy to adjust your screen angle or share your display during meetings.

### **Package includes**
