

Urban Armor Gear UAG iPhone 17 Pro Max Monarch Pro - Kevlar Mallard delivers uncompromising protection and bold style for your iPhone 17 Pro Max. With a rugged multi-layer construction, premium Kevlar elements and full MagSafe compatibility, this case is built for those who demand maximum durability without sacrificing functionality or design.

- Robust 5-layer construction
- Reinforced with premium Kevlar inserts
- Drop protection up to 7.6 meters
- Integrated magnetic module for MagSafe and wireless charging
- Enhanced grip, oversized buttons and lanyard anchor points

Robust 5-layer construction

The UAG Monarch Pro is engineered with a sophisticated 5-layer design that surrounds your iPhone 17 Pro Max with all-round protection. An impact-resistant core absorbs shocks from daily bumps and accidental drops, while the signature armored frame and polycarbonate shear plate add structural rigidity. An impact-resistant rubber surround further cushions the device, helping to disperse impact forces away from your phone. The integrated magnetic module is seamlessly built into this layered construction, so you get top-tier protection and modern magnetic functionality in one sleek, rugged case.

Reinforced with premium Kevlar inserts

For superior strength and durability, the Monarch Pro incorporates Kevlar inserts into its distinctive armored frame. This high-performance material is renowned for its exceptional toughness and resistance to wear, giving your case an extra level of reinforcement in key stress areas. Beyond its protective benefits, the Kevlar pattern combined with the Kevlar Mallard colorway gives the case a striking, technical look that stands out while still complementing the premium design of your iPhone 17 Pro Max.

Drop protection up to 7.6 meters

The UAG Monarch Pro is built to handle extreme conditions. Independently tested to withstand drops from heights of up to 7.6 meters, this case exceeds 5 times the requirements of standard military drop-test certification (MIL STD 810G 516.6). Corners and edges are reinforced to protect the most vulnerable parts of your device, while raised bezels help shield the screen and camera lenses from scratches and direct impacts. Whether you are outdoors, on the job or simply navigating daily life, you can trust the Monarch Pro to keep your iPhone protected.

Integrated magnetic module for MagSafe and wireless charging

Stay powered and connected without removing your case. The built-in magnetic module is fully compatible with MagSafe, Qi and most other wireless chargers and magnetic accessories. Strong, precise alignment ensures secure attachment to chargers, wallets and mounts, while maintaining efficient wireless charging performance. The design also remains compatible with mobile payment services, so you retain full functionality and convenience while enjoying robust protection.

Enhanced grip, oversized buttons and lanyard anchor points

The Monarch Pro is designed not only to protect, but also to improve how you handle your iPhone 17 Pro Max. A contoured, non-slip edge provides a secure grip, reducing the chance of accidental drops, even in wet or demanding conditions. Oversized tactile buttons offer crisp, responsive feedback, making it easy to adjust volume or activate the side button, even with gloves. Integrated lanyard anchor points give you the option to attach a wrist strap or lanyard (not included) for additional security and hands-free carrying when you need it.

SPECIFICATIONS

Carton: 4/32
 Item ID: 114514113955
 EAN: 840283922084
