

## UAG Trooper Case with Magnet for Samsung Galaxy S26 Ultra - Opaque Black

Urban Armor Gear Samsung S26 Ultra Trooper with Magnet in Opaque Black is a rugged two-piece case built for serious drop protection, secure grip, and everyday practicality. It combines reinforced impact absorption with a built-in magnet module for smooth use with wireless charging and magnetic accessories.

- Two-piece design with easy installation and port cover
- Built-in magnet module for wireless charging and magnetic accessories
- Rugged PC and TPU co-mold construction with impact-resistant core
- Up to 9.1 m drop protection with MIL-SPEC testing
- Secure grip and responsive oversized buttons

### Two-piece design with easy installation and port cover

The Trooper uses a two-piece construction designed to install quickly and fit securely. An integrated port cover helps protect against dust and debris during daily use, especially when you're on the move.

### Built-in magnet module for wireless charging and magnetic accessories

A built-in magnet module aligns the phone for a stable connection with compatible magnetic accessories and supports Qi wireless charging. It is compatible with MagSafe-style magnetic accessories and works with most wireless chargers, while still supporting Samsung Pay.

### Rugged PC and TPU co-mold construction with impact-resistant core

The case combines PC and TPU in a co-mold design to help manage impacts and everyday knocks. A reinforced, soft impact-resistant core adds another layer of shock absorption without making the case feel bulky in hand.

### Up to 9.1 m drop protection with MIL-SPEC testing

Tested to withstand drops up to 9.1 m, the Trooper is built for environments where accidental drops are more likely. It also passes 5X MIL-SPEC 810G-516.6 testing to provide added confidence in demanding conditions.

### Secure grip and responsive oversized buttons

A traction texture improves grip to reduce the chance of slips, while oversized tactile buttons are designed to feel precise and easy to press. The result is better control of your phone without sacrificing protection.
