- Compatible with all other WOOX Smart devices
- Exceptional build quality

Zigbee Kit with Two Smart Radiator Valves
Our kit comes with two Smart Radiator Valves, providing flexibility and control over the heating in different rooms. The valves are designed with solid build quality that assures lasting performance.
Compatibility with Danfoss RA, RAV, RAVL
The Woox Valve is designed to fit all popular European radiators, including Danfoss RA, RAV, and RAVL models, ensuring seamless integration into your existing system.

Works with Amazon Alexa and Google Assistant
Take advantage of Amazon Alexa and Google Assistant's voice control services to manage your radiator temperatures effortlessly and efficiently.

Remote temperature control through the free WOOX Home app
Stay completely controlled from anywhere, anytime, using the free WOOX Home app. The app offers detailed and real-time information about your radiator’s performance for enhanced control.

Compatible with all other WOOX Smart devices
The Woox Valve seamlessly integrates with all other WOOX Smart devices, paving the way for a comprehensive and intelligent temperature control system.

Exceptional build quality
The Valve boasts a solid build quality that can withstand regular usage. The complete accessory kit ensures easy installation and hassle-free usage.
The R7067 Smart Radiator Valve Kit (Zigbee) is very helpful and smart for controlling radiator temperatures at home or at the office. With its solid build quality and full accessory kit included, the R7067 can fit all popular radiators in Europe.
