MAUS Xtin Klein

ABOUT MAUS XTIN KLEIN

MAUS Xtin Klein is a fire extinguisher that fights smaller fires in the initial phase with a potasslum-based smoke that extinguishes the fire.

COMPOSITION

Agent: 57.5%. PVC: 17.6.6%. Aluminum: 15.3%.
Pyrotechnic rate: 9.6%

VOLUME/PULP

The pulp and packing volume has been optimized in accordance with Swedish standard SS-EN 13427: 2004 (Packaging - Application of European standards in the field of packaging and packaging waste).

ENVIRONMENTAL RESEARCH

We research and evaluate our operations and products with the aim of constantly improving: cost efficiency, quality, environmental adaptation, pollution potential, energy efficiency, energy consumption, work environment and environmental protection.

SVEBRA

Falkenheim Invest AB is a member of SVEBRA, which conducts consultation and information activities to increase knowledge about fire safety and raise awareness of fire risk in the country. SVEBRA collaborates with insurance companies, MSB (Swedish Civil Contingencies Agency).

EXAMINATION

The products under the MAUS™ brand have been reviewed by the following Scandinavian Authorities: DSB in Norway, Tukes in Finland and MSB in Sweden.

PRODUCTION

MAUS Xtin Klein is manufactured in a factory with ISO 9001: 2010 certified management and quality system.

LOGISTICS & PACKING

Transportation takes place according to the latest logistics concepts and with the least possible environmental impact. Factory packaging is highly recycled and external packaging is purchased through ISO 14001 certified suppliers. The customer takes responsibility for the packaging.

RECYCLING

Units with the expiry date must be returned to Falkenheim Invest AB for destruction, in accordance with MSB's regulations, or returned to the local recycling center and sorted as Spray can with content. The recycling potential has been evaluated on the basis of recommendations from Lidköping Municipality's Environmental Management.

MAUS™ is a registered trademark of Falkenheim Invest AB. Since 2015 MAUS™ decontamination-free fire protection concept has become part of the equipment of customers such as: PostNord (Swedish Postal Service), the Swedish Police, the Swedish National Bomb Protection, Anticimex, Swedish Match, the Swedish Enforcement Agency, Sandvik, Stora Enso etc. Falkenheim Invest AB has its headquarters in Lidköping, Sweden.
